## WEB APPLICATIONS DEVELOPER

I am an experienced Developer with the ability to learn and collaborate in rapidly changing environments. Worked through 1000+ hours of bootcamp structure, learning Javascript, React.js, Node.js, PHP

## WORK EXPERIENCE

### Northwestern University Web Applications Developer

June 2023 to Present

- Ensure the performance, security, and reliability of university web applications
- Collaborate with digital team members to gather requirements and translate them into technical specifications
- Develop, test, and deploy scalable web applications

### Dynamic, Inc. Lead Front-End Developer

Oct 2021 to June 2023

- Leading multiple projects to completion translating web designs from platforms such as Adobe Photoshop, Adobe XD, Figma, and Sketch
- Used a variation of build tools between client projects such as Bootstrap, SASS, Node.js, Gulp and Webpack
- Updating Company Front-End workflow with a new boilerplate to improve efficiencies and code quality utilizing Webpack and newer front end dependencies
- Contributing development to agency and community-maintained open-source modules
- Monitoring hosting performance, communicating with team members internally/externally
- Utilizing open-source CMS systems such as Silverstripe, Drupal, and WordPress
